SECRET

Memorandum

TO : DAD/IO

DATE: 6 July 1965

FROM : DAD/S&D

SUBJECT: Clandestine Modular Systems

REF : OEL 842/65

The referenced memorandum requested that OPD and AND be provided with an estimate concerning a CSB program on nanowatt devices. ORD is working in this basic area, and we anticipate incorporating this type of technology wherever it is suitable. I would guess that the earliest appearance of these types of techniques in the microwatt area might be two to three years; the nanowatt devices are probably not in the picture for seven to ten years. Would be happy to get the ORD people to give us a run down on their outlook here if this would be of interest to you.
